

Hyco has a small range of commercial hair dryers for hotel rooms and sports centres.

- A **holster-style** dryer is more suitable for hotel rooms (see HD190L) because it is quite powerful at 1300W, but not waterproofed for bathroom use.

- The **wall mounted** hair dryers (see HD700 and HD15015) are IP rated and therefore suitable for bathrooms or any application where there is a possibility of the unit being splashed with water.
